Profile

I am a full stack web developer. I have a strong background in both front-end and back-end development. I specialize in building dynamic and user-friendly web applications.

On the front-end, I'm skilled in HTML, CSS, and JavaScript, and I'm proficient in frameworks like React.

When it comes to the back-end, I have expertise in server-side programming languages such as Node.js. I'm using framework like Express.js.

Projects

E-commerce Website, *Solemate - An online selling website, also known as an e-commerce platform, is a website that enables individuals or businesses to sell products or services to customers over the internet.*

Social Media clone, *Facebook clone - Creating a complete clone of Facebook, which is a complex and established social media platform, would be a significant undertaking. However, I can provide you with a general overview of the key features and components typically found in a social networking website similar to Facebook.*
